## STAFF SOFTWARE ENGINEER | AI AGENTS | BACKEND SYSTEMS

Bengaluru, India | shubham101203095@gmail.com | linkedin.com/in/shubham-singla-864a55106 | github.com/singla3095

### SUMMARY

Staff Software Engineer at Indeed with 10+ years of experience building AI agents, payment systems, cloud platforms, and enterprise products across India and Singapore. Combines hands-on architecture with team leadership and pragmatic production delivery.

### EXPERIENCE

- Staff Software Engineer | Indeed**  
Bengaluru, India

Jun 2025 - Present

  - Develop and deploy intelligent agents and multi-agent architectures with LangGraph.
  - Integrate and optimize multiple LLM APIs through custom tooling for efficient agent communication.
  - Build an AI-powered hiring agent for candidate sourcing and a context-aware recommendation platform for employers.

**Focus:** AI agents, LangGraph, LLMs, generative AI, Python, recommender systems, NLP
- Senior Software Engineer | Indeed**  
Bengaluru, India

Sep 2022 - Jun 2025

  - Built and improved production software for Indeed before promotion to Staff Software Engineer.

**Focus:** Backend systems, platform engineering, product delivery
- Senior Backend Engineer | Grab**  
Singapore

Jun 2019 - Sep 2022

  - Built the GrabPay debit-card platform from the ground up as one of the project's first engineers.
  - Designed scalable, high-volume, low-latency services across Grab's payments ecosystem.
  - Led a team of three engineers across system design, requirements, delivery quality, and code reviews.

**Focus:** Go, payments, low-latency architecture, high-throughput services
- Senior Software Engineer / Software Developer | Works Applications**  
Singapore

Oct 2016 - Jun 2019

  - Designed serverless architecture for an on-premise to AWS migration using Lambda, DynamoDB, S3, and Elasticsearch.
  - Created Spark batch-processing systems on AWS Batch for large-scale file workflows.
  - Built customer-facing commerce and inventory capabilities for a Japanese ERP platform.

**Focus:** AWS, Lambda, DynamoDB, S3, Elasticsearch, Spark, AWS Batch
- Software Developer | Walmart eCommerce**  
Bengaluru, India

Jan 2016 - Jul 2016

  - Built a reusable tooltip system for ASDA's e-commerce customer-satisfaction team.

**Focus:** E-commerce, customer experience, frontend systems

### TECHNICAL SKILLS

**Languages:** Java, Go, SQL | **Systems:** Kafka, Redis, Elasticsearch, Kubernetes | **Cloud:** AWS, Terraform, Lambda, AWS Batch | **Data:** MySQL, MongoDB, DynamoDB

### EDUCATION, PROJECTS AND CREDENTIALS

**Bachelor's degree, Computer Science** - Thapar Institute, 2012 - 2016  
**Projects:** NIFTY50 Trader Pro - market intelligence dashboard; Digital Bio Maker - no-code portfolio builder  
**Languages:** English, Hindi  
**Credential:** MongoDB with Java Spring Boot (issued Jun 2023)
