## BACKEND & AI ENGINEER | ENGINEERING LEAD

Bengaluru, India | shubham101203095@gmail.com | linkedin.com/in/shubham-singla-864a55106 | github.com/singla3095

### SUMMARY

Backend and AI engineer with 10+ years of experience building payment systems, cloud platforms, enterprise products, and applied AI capabilities across India and Singapore. Combines hands-on architecture with team leadership, mentoring, and pragmatic production delivery.

### EXPERIENCE

#### Software Engineer II | Indeed

Sep 2022 - Present

Bengaluru, India

- Lead a team delivering high-impact projects across multiple domains, including an initiative applying advanced machine learning models to product capabilities.
- Mentor engineers through design reviews, ownership growth, and pragmatic production decisions.
- Drive platform performance and user-engagement improvements while aligning engineering execution with strategic goals.

**Focus:** Java, applied AI, distributed systems, technical leadership

#### Senior Backend Engineer | Grab

Jun 2019 - Sep 2022

Singapore

- Built the GrabPay debit-card platform from the ground up as one of the project's first engineers.
- Designed scalable, high-volume, low-latency services across Grab's payments ecosystem.
- Led a team of three engineers across system design, requirements, delivery quality, and code reviews.

**Focus:** Go, payments, low-latency architecture, high-throughput services

#### Senior Software Engineer / Software Engineer | Works Applications

Oct 2016 - Sep 2019

Singapore

- Designed serverless architecture for an on-premise to AWS migration using Lambda, DynamoDB, S3, and Elasticsearch.
- Created Spark batch-processing systems on AWS Batch for large-scale file workflows.
- Built customer-facing commerce and inventory capabilities for a Japanese ERP platform.

**Focus:** AWS, Lambda, DynamoDB, S3, Elasticsearch, Spark, AWS Batch

#### Software Engineering Intern | Walmart Labs

Jan 2016 - Jul 2016

Bengaluru, India

- Built a reusable tooltip system for ASDA's e-commerce customer-satisfaction team.

**Focus:** E-commerce, customer experience, frontend systems

### TECHNICAL SKILLS

**Languages:** Java, Go, SQL | **Systems:** Kafka, Redis, Elasticsearch, Kubernetes | **Cloud:** AWS, Terraform, Lambda, AWS Batch | **Data:** MySQL, MongoDB, DynamoDB

### EDUCATION, PROJECTS AND CREDENTIALS

**Computer Engineering** - Thapar Institute, 2016

**Projects:** NIFTY50 Trader Pro - market intelligence dashboard; Digital Bio Maker - no-code portfolio builder

**Languages:** English, Hindi

**Credentials:** AWS Certified Solutions Architect - Associate (issued Dec 2020, expired Dec 2023); MongoDB with Java Spring Boot (issued Jun 2023)
